

Technical Visit – Exkursion zum Versuchsdeich

South Baltic Cross-border Co-operation Programme 2007-2013

Invitation

The chair of Geotechnics and Coastal Engineering of the University of Rostock together with the DredgDikes project consortium invites you to the 2013 DredgDikes open day on the Rostock test dike on **Tuesday 24 September 2013, from 10:00 – 13:00 hrs**. In September large scale overflowing experiments will be performed on the slopes that were constructed one year ago, which can be visited during this event. Also seepage experiments are performed on a regular basis.

We are looking forward to welcome you on the research site near the Baltic Sea beach. For better organisation we would like to ask you to register with Mrs. Nitschke (elisabeth.nitschke@uni-rostock.de).

Programme 10:00 – 13:00:

Tour on the research site with different stations

- Construction issues, installed dredged materials
- Instrumentation, seepage measurements
- Greening, different greening tests
- Overflowing experiments on the dike slopes

Catering will be provided.

Travel:

The research dike is situated on the containment area „Radelsee“ between Rostock-Warnemünde and Markgrafenheide. You may either come from Markgrafenheide or from Warnemünde (ferry Hohe Düne). Coming from Markgrafenheide you will have to turn left directly behind the beach parking areas at the only two prominent buildings at this road. Please follow the signposts from there. A detailed description will be available on the DredgDikes website www.dredgdikes.eu.

Prof. Dr.-Ing. Fokke Saathoff
