## Rostock Test Dike South Baltic Cross-border Co-operation Programme 2007-2013

### How to find the test dike

To get to the DredgDikes research dike in Rostock, please follow one of the two following routes. Once you are on the containment area, you can see the blue DredgDikes container on a prominent spot. This will be the usual meeting point.

#### **From Rostock via Warnemünde**

##### *By car*

To get to Warnemünde take the motorway from Rostock. Just before Warnemünde, you will have to turn right to the river ferry (follow the signs to ferry and cruise liner port). Take the ferry across the river Warnow to Hohe Düne. After 2.5 km please turn right just before the two prominent buildings and just behind the military site with two large antennas to enter the containment area.

##### *By public transport*

To get to Warnemünde take the S-Bahn from Rostock main station. Please get off at the terminal station and walk East to the ferry crossing the river Warnow to Hohe Düne (follow the pedestrian signs). From Hohe Düne please take the bus no. 17 to the stop "Taterhörn" (4<sup>th</sup> stop). The stop is located directly at the entrance of the containment area.

#### **From Rostock via Markgrafeneheide**

##### *By car*

To get to Markgrafeneheide please take the route from Rostock to the North-East (L22). You will drive through Markgrafeneheide. Behind the village there are several large parking plots on the left that serve the beach tourists. Just at the end of these parking areas there are two prominent buildings. Please turn left directly behind these buildings to enter the containment area.

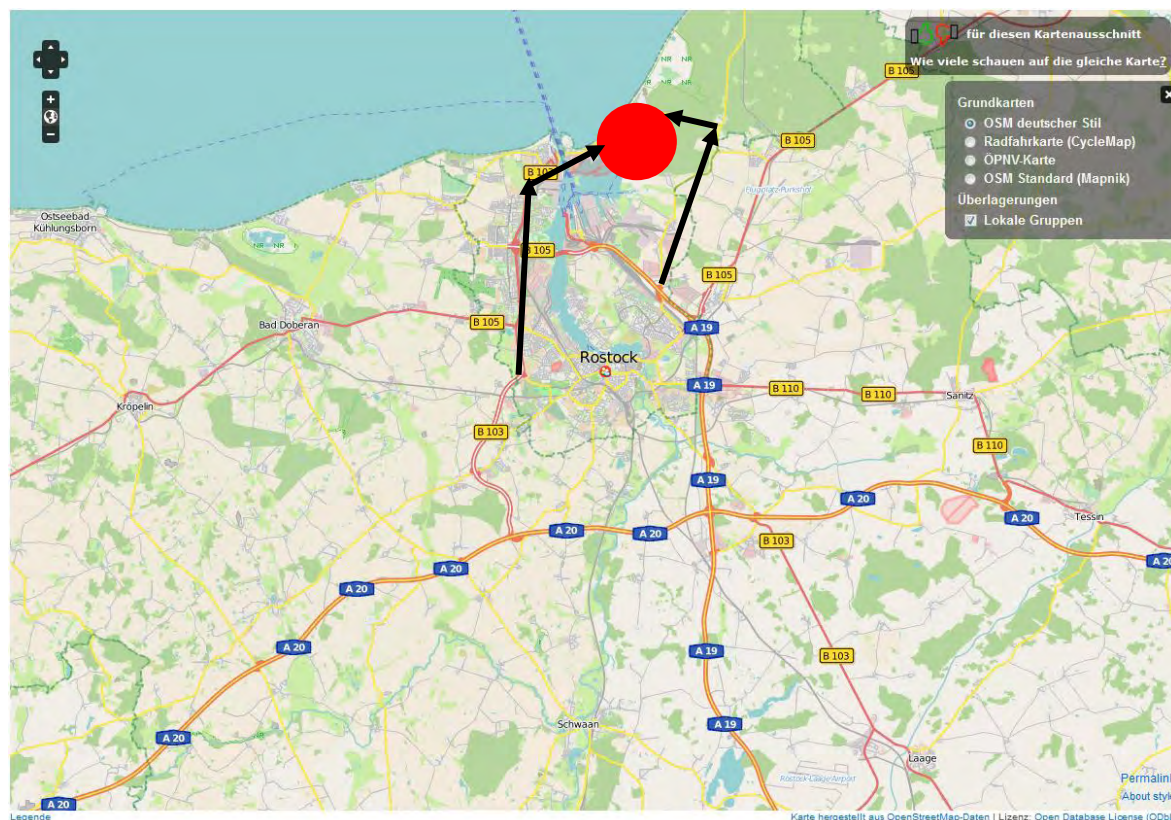

##### *By public transport*

Take the trams no. 2 or 4 from Rostock city centre to "Dierkower Kreuz", then change to bus no. 18 to Markgrafeneheide. You will have to go through Markgrafeneheide and get off at the stop "Taterhörn". The stop is located directly at the entrance of the containment area.
